Press Release

4matix wins tow ORACLE/IPM Conversion RFP's

Concord, CA, August 2015– 4matix, Inc. today reported two recent RFP wins.

4matix has been chosen to do two conversions for ORACLE IPM customers, a City in Texas and a County in GA.

In Texas - 4matix will be converting ORACLE/IPM COLD data to Laserfiche. The COLD data will be parsed out by department and delivered back as formatted ASCII text. All inbound reports will be accompanied with indexing for direct import into the City's Enterprise Laserfiche System.

In Georgia, 4matix will be converting COLD and Image data from an ORACLE IPM Optical environment. Currently the County cannot access this data and was in need of an off-site conversion provider who could natively read the Optical platters and deliver back the converted report and image data. All data will be delivered back for DIP into OnBase – the County's Enterprise ECM platform.

About 4matix:

4matix is a fourteen-year-old professional services firm specializing in the conversion of data between ECM platforms. We have done conversion work for all levels of Government as well as small and large corporate clients.

Our Operations and Engineering staff have collectively over 45 years of experience doing ECM data migrations. Each project is customized based on the source and target systems as well as the customer's own unique requirements.

Treat your data as if your business depends on it – WE DO!
